## RoHS-REACH Declaration of Conformity

### Declaration of Conformity – RoHS

We hereby confirm the conformity of our products with Directive 2011/65/EU (RoHS) and Delegated Directive (EU) 2015/863 of the European Parliament and of the Council on the restriction of the use of hazardous substances in electrical and electronic equipment.

The maximum permitted concentrations in homogeneous materials are complied with, with cadmium below 0.01% and lead, mercury, hexavalent chromium, polybrominated biphenyls (PBB), polybrominated diphenyl ethers (PBDE) and the plasticizers DEHP, BBP, DBP and DIBP each below 0.1%. KUK Electronic AG declares that all products are RoHS-compliant unless otherwise stated.

Exceptions in accordance with Annex III, point 7a relate to applications where high-temperature solder containing more than 85% lead is required; these fall under the permitted exceptions and are also considered RoHS-compliant.

### REACH Declaration of Conformity

For the purposes of Regulation (EC) No 1907/2006 (REACH), KUK Electronic AG is a downstream user. Our products are considered to be articles from which there is no intended release of substances under normal and foreseeable conditions of use.

Consequently, our company is not subject to any registration obligations under REACH, provided there is no intended release of substances. We take appropriate measures to ensure that our suppliers comply with the requirements of the REACH Regulation. In particular, we ensure that no substances on the current Candidate List of Substances of Very High Concern (SVHC) are present in concentrations exceeding 0.1% (w/w).

The assessment is based on the Candidate List currently published by ECHA as of March 2026 and is continuously updated.
